SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Probability and Statistics
Manuscript Number:	**Ms_AJPAS_45016**
Title of the Manuscript:	**DETERMINANTS AND MANAGEMENT OF PATIENT WAITING TIME IN THE GENERAL OUTPATIENT DEPARTMENT.A CASE STUDY OF KIBABII UNIVERSITY HEALTH CLINIC.**
New title of the Manuscript:	**DETERMINANTS AND MANAGEMENT OF PATIENT WAITING TIME IN THE GENERAL OUTPATIENT DEPARTMENT IN KIBABII UNIVERSITY HEALTH CLINIC, KENYA**
Type of Article:	**Original Research Article**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
Author uses sigma for arrival rate instead of standard lambda (page 7). **Value of rho is computed to be 1.7778 (p.8), which means that the arrival rate is greater than the service rate, which means that the line continues to grow** **indefinitely, which means that the p_i are all equal to 0, and the expected number in the system is infinite. i.e the calculations on p. 8,9 are all incorrect, and make no sense.** **Table 3.0.2 still has a double listing for the 21-35 minute category, with different numbers!! This explains the ridiculous figure 3.03 with the big drop in the middle, which should not even be present.**	**corrected**
