PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
As I said during first review - chapters cannot start with tables. Authors should add text before tables or figures. The problem is still in the text. For example chapters 3.0.2, 3.0.3, 3.0.4, 3.0.5, 3.0.6 etc. In my opinion Authors should rebuild structure of chapters in the paper. Two more comments about references: Authors have to prepare references according to journal template. There are different reference style in current version of the paper. Some publications are two times in references: "[14]. Kendall, David G. "Stochastic processes occurring in the theory of queues and their analysis by the method of the imbedded Markov chain." The Annals of Mathematical Statistics (1953): 338-354. [15]. Kendall, D. G. (1953). "Stochastic Processes Occurring in the Theory of Queues and their Analysis by the Method of the Imbedded Markov Chain". Ann. Math. Statist.24(3)1953 [16]. Kleinrock, Leonard. Queueing systems, volume 2: Computer applications. Vol. 66. New York: wiley, 1976. [17]. (Kleinrock, 1975) Kleinrock, L. queueing systems, Vol. 1, Theory. New York, Wily, 1975. (ISBN 0-471-49110-1)" Authors should rewrite the paper by using correct template and according to comments above. The paper should be review one more time after that process.	**Corrected**
