SDI Review Form 1.6

**PART 1: Review Comments**

| | **Reviewer's comment** | **Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)* |
|---|---|---|
| **Compulsory** REVISION comments | The article definitely addresses a very vital issue of the role of fetal impaired growth & development due to non-infectious environmental, nutritional factors on the future possibilities of development of non-communicable chronic diseases in adult life. The paper has been too detail & too elaborate [19 pages is too much in my opinion] for a review article & I suspect it would be difficult to draw the attention of a reader with full concentration. Requesting to take this comment to be considered sincerely.<br><br>The references should be cited in the text within third bracket rather than first e.g. [3], [24] etc.<br>A list of all the abbreviations at the end of the paper is worth adding.<br>References are relevant and mostly after 2000.<br>Even the conclusion has been too long, should be cut shorter.<br><br>At the end of the introduction, the principal objective of the authors for carrying out the study should be mentioned. | 1. **19 pages ((rewriting and remove repetition))**<br>2. **The references should be cited in the text within third bracket rather than first ((Done))**<br>3. Abbreviations ((Added))<br>4. Conclusion ((Made shorter))<br>5. principal objective ((Added)) |
| **Minor** REVISION comments | | |
| **Optional/General** comments | Informations added to justify the objectives are quiet sufficient. | Add |

**PART 2:**

| | **Reviewer's comment** | **Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)* |
|---|---|---|
| **Are there ethical issues in this manuscript?** | *(If yes, Kindly please write down the ethical issues here in details)* | |
