

Editor's Comment:

The authors did not answer to all referees criticisms (see referee LAR).

Overall the review looks more as a copy paste rather than a critical evaluation of literature. Moreover, what is the method used? What are the Criteria? How many paper consulted? How many discharged and why? Why so old literature? A decision three would help. English is poor and need to be improve. A 34% similarity index was detected with the turnitin software which is acceptable.

In my opinion the paper should not published as it is.
