

Editor's Comment:

Yes I have reviewed the revised version. The authors still need to revise the manuscript based on the following observations:

- (i) The references must be in squared brackets; one reference was not numbered (this is indicated in the text), this will automatically affect the numbering both the citation and listing;
- (ii) Headings and subheadings were not numbered such as 1.0, 1.1, 2.0, 2.1 etc
- (iii) The Figures and Tables must appear in a page following the first page of mentioning.
- (iv) The letters a, b and c on the bars of the Figures were not defined.

I urge the authors to take their time to effect these corrections. Once these are done, the manuscript can be considered.
