PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This paper is a study/review concerned about 'smart vehicle tracking'. It is obviously a B. Tech/ M. Tech project work and is OK for that level. To enhance it as a journal paper, some additions/modifications in the idea of presentation have to be done. Just by presenting the idea of GPS and GPRS etc. is not enough for that purpose. There are no mentions about what data was used, examples of data, algorithms/methodologies used and the results and conclusion.</p> <p>Though the idea is not new, it can be made attractive after making certain additions. That is where this paper lags behind.</p>	The manuscript has been modified
Minor REVISION comments	<p>[This <i>project</i> presents the development of the vehicle tracking system's server and client software.] Please make basic modifications. Problems and mistakes like these clearly bring down the quality of the paper.</p>	
Optional/General comments	NONE	

PART 2:
