Manuscript Number:	Ms_OR_51298
Title of the Manuscript:	Endophthalmitis : 5 yearsExperience in a tertiary eye care center (ou) in The Mohammed V Military Medical Training Hospital
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>In material and methods, could you please explain if the microbiological diagnosis was based on conjunctiva or aqueous / vitreous samples and specify the number of each.</p> <p>In results, if possible you could specify the principal characteristics (type of endophthalmitis, microbiologic diagnosis, etc) of the eyes that needed evisceration.</p> <p>No reference is made in the text to Table 6. You could put this comparative data with other studies in the discussion.</p> <p>Review the conclusions of the text. Should record the most important results of the study and be consistent with those of the abstract</p>	<p>30 conjunctival samples, 11 vitreous samples.</p> <p>Failure of treatment occurred in 5 patients who unfortunately needed an eye evisceration : 1 was postoperative, 1 endogenous and 3 post-traumatic. Microbiologic samples isolated 1 hemophilus 1 Pseudomonas aeruginosa and 1 candida albicans.</p> <p>Table 6 deleted.</p> <p>Conclusion have been changed.</p>
