PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Replace keywords that are already in the title Add geographic coordinates of the study area Manuscript needs careful spelling review To detail in the methods the physical and chemical parameters of water that were evaluated in the study. Add author and year of taxon according to scientific nomenclature norms Standardize text font throughout the manuscript, Times parts, Arial parts Relativize the result. Of course, it is not just physical and chemical factors that define the occurrence and abundance of any organism in any environment. Review the conclusion. It is not the environmental factors evaluated that define the occurrence and abundance of species. Actually, the evaluated environmental factors were correlated, but there are unevaluated factors that are also determinant. Only 1/3 of the references are from the last five years. Update.</p>	
Minor REVISION comments	<p>See comments</p>
