PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This paper deals with the Application of GIS in the assessment of groundwater quality, it is important for the study of the quantity of water distribution around the area, and find out the pollution sources, so I support it to be published in the journal after minor revision. 1, all tables are in three-lines format; 2, figure 3a-c must describe the contents of the subplots in the figure titles; 3, how about heavy metals ? 4, what new results have you gotten from the distribution maps besides the presentation? 5, what is the definition of Suitability in your paper?	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
