Compulsory REVISION comments		
Minor REVISION comments	<p>“haematologic challenges [26]. The haematological consequences of HIV infection is mostly cause by peripheral blood cytopensis which have become more apparent during this era of HAART.”</p> <p>All these are spelling errors which need to be corrected.</p> <p>“We concluded from our finding that HCV infection has clinical impacts on both biochemical and haematological parameters of patients on ARDs. Therefore, it is recommended to make HCV antibody screening paramount important for every HIV infected persons before initiation ARDs and monitoring of liver enzymes abnormalities and haematological parameters on regularly basis during ARDs usege in both HIV mono-infected and co-infected persons. This may have helped in achieving the desired goal of the treatment.”</p> <p>All these are spelling errors which need to be corrected.</p>	
Optional/General comments
