PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Good paper fit for publication by IJBCRR.</p> <p>However, at the level of materials and methods, the study area should be described in detail; and the data analysis procedure should equally be described in detail, including the statistical software(s) used for data analysis.</p> <p>The results of the study should be presented in a more coherent manner. The results section should not begin with bar charts. And more inferential statistics should be integrated in the findings of the study in order to give it more depth and scientific relevance.</p> <p>The discussion of the findings of the study should be done in a more comparative and analytical fashion i.e. comparing and contrasting the findings of the study with the findings of other related research works; and proffering plausible justifications for the findings unearthed by the study.</p> <p>Last, but not the least, the practical and policy implications of the study should be explained.</p>	
Minor REVISION comments	More recent scientific publications in the domain should be sourced and referenced at the level of the introduction and discussion of findings.	
Optional/General comments	Good paper fit for publication by IJBCRR. However, the afore-cited comments and evaluations should be taken into account before the paper is considered for publication.
