PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	• The paper should be checked for language and grammar issues. • The introduction should be written more clearly, highlighting the aim of the paper. Also, authors should provide the structure of the paper in the last paragraph of the introduction. • The authors should consider providing authors' names when elaborate their ideas and conclusions in the Literature review part. Also, authors should state the purpose of literature review at the end of this part: Why these studies were chosen, and what they expect based on the achieved results in the previous studies? • Some references presented in the reference list are not mentioned in the text - number 14 and 15. • Hypothesis should be clearly specified. Also, methodology should be more deeply elaborated since, several models were applied but without clear explanation. • The explanation of the ADF test below the table 4.1 is not correct ("since t-test values were greater that t-critical values on all cases" see for example Gujarati (2004), Basic Econometrics, McGraw-Hill) • The authors should consider explaining the macroeconomic context of South Africa and data used in the study.	
Minor REVISION comments		
Optional/General comments	The paper is dealing with an interesting subject related to the effectiveness of inflation targeting in the South Africa context. The authors should consider more in-depth analysis of the studied issues.
