	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>It would be very useful to add in "Abstract" section the purpose, objectives and results of the research. The paper has not JEL Classification.</p> <p>It would be very useful to add in the "Introduction" section the purpose, objectives and hypothesis of the research. The authors must present the research hypotheses in the methodology section. The equations should be written using the equation software. The authors must present econometric models with two or three independent variables. The authors must provide the software they have processed and the database they have accessed. I recommend the authors to present the novelty of this research compared to previous research. The paper is too theoretical one. The authors must present what are the differences between fixed costs and semifixed costs, and the variable costs. The period of the research must be extend (2014-2016 is a short period) The authors must develop the conclusions (only one sentence is not enough!!! Authors should cite papers published in journals indexed in Web of Science such as: Batrancea, I., Batrancea, L., Nichita, A., Gaban, L., Masca, E., Fatacean, G., Moscviciov, A., An econometric approach on production, costs and profit in Romanian coal mining enterprises, Economic Research, 2019, 32(1), pp.1019-1036, ISSN: 1331-677X, 2019, 10.1080/1331677X.2019.1595080 Authors have to follow the guidelines of the journal!!</p>
