

### **Editor's Comment:**

I get lost among the many form, could you submit the one I must fill in?

The manuscript still contain many errors here they comes:

Title: You should consider changing the title and deleting bulk because you report only analysis of tablets.

Abstract, line 9: high performance liquid chromatographic not high performance chromatographic

Abstract, line 15,22,23,24: 5Åμ???

Introduction, line 43: (4',3':6,7), it's not chemically written

Figure 1 and 2 could be done with Chemdraw

line 80: 400 mg not 400mg

line 84: 5μm not 5μ

line 86: Waters not Water

line 91: in abstract it's reported 258 nm, here 285 nm....what is the correct wavelength?

line 117: reggration....Did you mean regression?

line 127: mobile phase composition change ±3: ±3 about what?

line 128: HCl not HCL

line 196: are you sure are inter-day data and not intra-day data?

Line 213-214: you reported "The limit of detection and limit of quantitation to be determined 0.0068μg/ml & 0.029μg/ml for VEL and 0.104 μg/ml & 0.347 μg/ml for SOF respectively."

while in the abstract you reported "The LOD and LOQ for VEL and SOF were found to be 0.0068-0.104 μg/mL and 0.029-0.342 μg/mL respectively."

line 215: The authors should compare the results of the modification with the normal conditions

Table 8: authors should indicate the conditions of degradation in water

Line 240-243: why the caption is in bold?

References: Reference styles should be uniform for all

### **Editor's Details:**

Dr. Stefano Manfredini, Professor of Pharmaceutical Chemistry and Toxicology, Department of Life Sciences and Biotechnology, Faculty of Medicine Pharmacy and Prevention, University of Ferrara, Ferrara, Italy
