

**Editor's Comment:**

The work remaining is the referencing and citation. I have asked the author to help with the alignment. I am yet to get a feedback. Remember I asked the author to use Mendeley to complete the reference and citation on a number of occasions. Well, the author never did. So I have asked the author to accomplish the alignment one more time before we can proceed. If I could proceed without the input of the author, I could gladly do that but it is not possible.
