

Editor's Comment:

The paper describes forest core demarcation using geo-spatial techniques of a forest location in India, a technique that can be used in other parts of the world.

The Author (s) have followed the series of stages to effect corrections base on review comments to modify the paper which has improved its quality.However,the following corrections need to be effected before publication.

(i)First sentence in the Abstract-Habitat interactions refers to NOT Habitat interactions referres to

(ii)Move down to the next page the heading 5.3.1 Selection of Plant Species and Planted area.

(iii)Acknowledgement- indicate the city of India where Vidyasagar University is located

After effecting the corrections, i recommend the paper for publication
