PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The theme is interesting. I have some advice.</p> <ol style="list-style-type: none"> 1. Introduction should be shorter. Here, the point is very simple. 1) EBF is healthy both for mother and infant and thus is recommended. 2) However, data showed that EBF rate is below the recommendation level of WHO, and thus 3) how the EBF is performed in this study area was studied. You need not state so much "EBF rate" in various areas. 2. Results: "40% of them had a monthly income above N40,000": What is N40,000? Please state if this is higher/lower than the average of your country. 3. Results: "mode of delivery and whether or not the nursing mother workplace do not encourage breastfeeding were also significantly associated with EBF practice." This is the key point of this study. Thus, please state how did you determine whether workplace does or does not encourage breastfeeding. 4. "antenatal": this is one word. 5. Limitation: "The study is facility based and it is where most mothers go to for immunizations": this should be written in "past tense". 6. "Crèche": this is French. Wikipedia indicates, "crèche is a Day care center, an organization of adults who take care of children in place of their parents". Please explain crèche in its first apparition. 	<p>I have reduced it</p> <p>2. N40,000 is higher than the minimum wage of the country, any woman receiving above N40,000</p> <p>3. the respondents were asked "do you have a place you can breastfeed in your work place"</p> <p>Ok noted Done</p> <p>The crèche I mean is where mother can go to breastfeed their babies</p>
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	There are no ethical issues in the manuscript
