

**SDI Review Form 1.6**

Journal Name:	<a href="#">Chemical Science International Journal</a>
Manuscript Number:	Ms_CSIJ_48303
Title of the Manuscript:	Predictive Modeling of the MCF-7 Anticancer Activity of a Series of Coumarin Derivatives Using Quantum Descriptors
Type of the Article	

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p><b>-Figure 1:</b> Molecular structures of coumain core and the studied coumarin derivatives : coumain is corrected as coumarin.</p> <p><b>- Figure 3:</b> Model regression line: "dogrusal" in the graphic is written English as linear. Figure captions should be start with big capitals.</p> <p>- "the dipole moment <math>\mu_D</math> is assumed to be the first descriptor in the prediction of anticancer activity." Given references. How can you decide this???</p>	We have corrected the manuscript by incorporating your suggestion
<b>Optional/General</b> comments
