SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	<p>The title of this manuscript sounds very promising but the content does not provide answers. This article seems to be more an overview of existing technologies for algaeculture than a research article.</p> <p>The intention of the article is not clear as there is no research question. Given the missing research question I cannot judge the consistency of results and discussion. I assume that the author(s) want to discuss pros and cons of different technologies but there is no methodology section that would guide the analysis.</p> <p>I suggest the author(s) to revise the manuscript and in particular to include (1) research questions, (2) methodology, (3) discuss the different technologies, (4) explain why algae would be 'an alternative to solving energy sustainability crises in developing countries'.</p>	<p>This paper was submitted under the "Review Article" segment. (3) and (4) have already been treated in the paper.</p> <p>Other aspects are have been adjusted to justify your review.</p>
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
