

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Agriculture and Ecology Research International
Manuscript Number:	2014_JAERI_14395
Title of the Manuscript:	ALGAECULTURE: AN ALTERNATIVE TO SOLVING ENERGY SUSTAINABILITY CRISES IN DEVELOPING COUNTRIES

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I agree with the short answer from author. There are many research works completed in the developing countries which is important part of bio-fuel development based on algae. The author mentioned Nigeria but there is no example work completed in Nigeria either demo-scale or lab-work in the revised paper.</p> <p>The paper will be published if some of fresh work done or being done in the developing country is added in the paper.</p>	<p>From my research I found no work done in Nigeria or other developing countries, reason why i decided to look into this as an avenue to sustainably solve energy crises in these areas of the world.</p> <p>I hope to find these works in time</p>
