

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Agriculture and Ecology Research International
Manuscript Number:	2014_JAERI_14395
Title of the Manuscript:	ALGAECULTURE: AN ALTERNATIVE TO SOLVING ENERGY SUSTAINABILITY CRISES IN DEVELOPING COUNTRIES

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Most of my prior comments were not taken into account in the revised version. In particular, I still miss the research questions that guide the analysis; the methodology that backed this review article, and a balanced discussion of the advantages and disadvantages of the various technologies for a sustainable development.</p> <p>The topic is highly interesting and relevant but this article misses a sound structure, for example elements of discussion are in the introduction and vice versa. Moreover, the manuscript does not follow general scientific requirements. I suggest the authors to thoroughly revise the manuscript.</p>	<p>I'm trying to understand what the reviewer means by "research questions that guide the analysis" and "the methodology that backed this review article" if a simple example is offered it would be of help.</p> <p>Advantage and disadvantage of raceway: lines 59-61 Advantage and disadvantage of photobioreactors: lines 66-70 and 86-87 respectively</p> <p>Wha are "general scientific requirements"???</p> <p>I would oblige to thoroughly review the article if the reviewer can please give more details on the various points he wants to be addressed</p>
