

SDI Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_48207
Title of the Manuscript:	Biological Control of Fusarium oxysporum f. sp. vasinfectum
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. The abstract should be written to reflect all the sections in the paper. For example, there must be elements of Introduction, Materials and Methods, statistical analysis, Results, Discussion of the findings and conclusions. 2. The Introduction Section needs to be improved, as the literature review is not sufficient. The author needs to justify strongly why this study is necessary and state clearly the aims and objectives. 3. The materials and methods are muddled-up and rather confusing. The Materials and methods should be written to show the sequence of the experiment. 4. Create sub-headings and arrange the activities in the materials and methods under the sub-headings appropriately. 5. Separate the Result and Discussion Sections. Present results first and let it be under the heading 'Results' and then a separate heading for 'Discussion' 6. The name of Journals in the Bibliography Section should be italicized. 7. The reference style must be written to comply with the format prescribed by the Journal. 8. Ensure that all references that are cited in the text are captured in the bibliography section. 9. Include the standard error bars in the Bar Chart (Figure 2.) 10. Improve on the language. You may wish to give the text to a native speaker to help improve the language. 	Agreed. All corrections were made. The figure 2, is just an illustrative figure, where no statistical analysis was made.
Minor REVISION comments	<ol style="list-style-type: none"> 1. Re-format the article such that you will have one data per page. For example, Figure 1. Should be on a single page and no text should be written on the page except the title. This should apply to all other Pictures and Tables. 2. The title of a Figure is usually written below the Figure while the title of Tables are written above the Table. 	Agreed, the corrections were made.
Optional/General comments	It is a good research work	Thank you !
