

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_27493
Title of the Manuscript:	ANTIDIABETIC, ANALGESIC, ANTIOXIDANT AND ANTIMICROBIAL ACTIVITY OF METHANOLIC EXTRACTS OF FRUITS AND SHOOTS OF BRASSICA OLERACEA VAR. ITALICA Linn.
Type of Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors took into account the most of previously submitted remarks and according to it they have edited manuscript. But there are still some doubts about the results of the statistical analysis. In the current edited version of the manuscript the authors state that for the statistical evaluation of the results was conducted one-way ANOVA with Dunnet's multiple comparisons post hoc analysis. However the results of this analysis are not presented neither in manuscripts charts or diagrams nor in manuscripts text. On purpose to submit manuscript for the publication the results of the statistical analysis must be presented in the manuscripts charts and graphics and detailed in the manuscripts text (section "Discussion")	Only necessary information were included in manuscript. We think that it is enough.
