

SDI Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_46539
Title of the Manuscript:	Comparison of the success rates of vaginal sonography and hysteroscopy in diagnosis of intrauterine pathologies in infertile women
Type of the Article	Case series

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The aim of this study was conducted to compare the efficiency of hysteroscopy and vaginal sonography in detecting the intrauterine pathologies in infertile women. The observation made by the authors of "sensitivity rates of hysteroscopy in diagnosing myoma by hysteroscopy as 100% " seems unlikely as intramural and subserosal myoma may not be always seen via hysteroscopy.</p> <p>Requesting the authors to kindly explain the same.</p> <p>Again why is the specificity so low than in cases of hysteroscopy...please elaborate.</p>	We acknowledged the result is most probably specific to our samples and should not be generalized to other populations without taking in to account other potentially involved factors.
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
