PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|--|
| Compulsory REVISION comments | It is an interesting article about interesting and important subject, however this article requires extensive English editing, nearly each sentence need to be rephrased. There are numerous errors that should be corrected, the word order in many places should be changed. Because of English the article is difficult to follow, some parts are impossible to understand. | Thanks. I have already modified the manuscript to become more reader friendly. |
| Minor REVISION comments | Abstract line 17: what do you mean by the latest pharmacokinetic and pharmacodynamics properties? I think it is our knowledge/understanding of the properties that changes, and not the properties themselves. Line 24: horribly emerging? Did you mean rapidly emerging? | Abstract line 17: corrected and marked. Line 24: corrected and marked. |
| Optional/General comments | | |
