Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	Ms_PSIJ_48369
Title of the Manuscript:	On the significance of the Fields' Energy-momentum Tensor
Type of the Article	

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>In this paper authors prove that the energy-momentum tensor can also be used for a consistency test of a field theory. Therresults show that the Dirac Lagrangian of a spin-1/2 massive particle yieldsconsistent results. On the other hand, problems exist with the present structure of quantum electrodynamics, and with quantum fields of massive particles that are described by a second order differential equation..</p> <p>The study is very interesting and manuscript is almost structured properly.</p> <p><b>Following Explanations are needed-</b></p> <p><b>Page 13: 8. Conclusions</b> <i>are to be re-written with point wise..</i></p>	Section 8 is revised.
<b>Optional/General</b> comments	<p>Manuscript is interesting and structured properly, but need to be improvised linguistically.</p> <p><i>The review manuscript is recommended for publication after incorporating above suggestion / comments.</i></p>
