**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	<p>The author(s) of the paper "On the significance of the Fields' Energy-momentum Tensor" have successfully enlightened readers on how the energy-momentum tensor can also be used for a consistency test of a field theory. The work would be more appreciated if real-life data is analysed to show areas application of the subject discussed in this paper.</p> <p>The content of the paper good substance, though it is more like a lecture note.</p>	<p>Section 7 and the revised version of section 8 show that every result of the analysis is supported by independent issues of the fields that are discussed in the paper. I think that these parts of the revised version show readers the connection of the results to real-life.</p>
