**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</b>
<b>Compulsory</b> REVISION comments	The experimental study described application of spruce wood flour as filler at paper production. Practically, it was confirmed that wood flour behaves as similar typical papermaking mineral fillers as clay, calcium carbonates etc. The study has a lot of discrepancies of objective and formally character. Main objective discrepancy – a lack of objective statistical evaluation the received experimental data, i.e. a presentation of confidence interval etc. The lack of more detailed information what type of laboratory handsheet machine and what type of cationic starch was used. It is appreciated a more detailed description of paper handsheets calendering simulation.	
<b>Minor</b> REVISION comments	The text contains a lot of grammatically mistakes and needs a language revision. For more details see the notices in the manuscript.	
<b>Optional/General</b> comments	Simply and classically written manuscript but with a lot of discrepancies formally and objective character.
