SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>ABSTRACT Methods: you did not mention the inclusion criteria. Conclusion: which "patient's psychological state"?</p> <p>INTRODUCTION Your numbering of References is weird. Can you follow the order of appearance in text? 27-28: can you precise how elevated are the risks (with a Reference)? 34: "his family", can you precise why is it "catastrophic"? With a Reference? 39: "We aim to provide" instead of "This systematic review creates..."</p> <p>METHODOLOGY I'd rather "Material and Methods" or only "Methods" for this title section. 44: replace "comprehensive" by "systematic". 45-46: erase "This systematic.review". 47: "until December".</p> <p>RESULTS Same comment for the numbering of References. Did not you want to make an analysis of the results of the 23 studies here? This is a major problem in your study: you did not compare the results (numbers and tables) in this section.</p> <p>DISCUSSION 92-93: what do you mean "This decision might be influenced...family member"? Without reference link, and what is the point in this study? 136: which ones have not? 226-227: which kind of collagens and proteoglycan polymorphisms are associated? 227-228: "morphology, family lifestyle..." what is this? No explanation and no reference link 239: what is "poor knee function" exactly? IKDC score, ROM, other? 250-251: erase "which carries obvious repercussions, and". 270: "Sonnery-Cottet".</p> <p>CONCLUSION 361-365: you may erase "This study...PRISMA guidelines" because it was previously mentioned, and is not for the Conclusion section. 366-371: these sentences are for the Discussion section</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
