

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_27493
Title of the Manuscript:	ANTIDIABETIC, ANALGESIC, ANTIOXIDANT AND ANTIMICROBIAL ACTIVITY OF METHANOLIC EXTRACTS OF FRUITS AND SHOOTS OF BRASSICA OLERACEA VAR. ITALICA Linn.
Type of Article	Original Research Article

### PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Yes there is.</p> <p>As mentioned earlier, the work lacks a good discussion.</p> <p>Still what has been produced is not a discussion, <b><i>rather repetition of results.</i></b></p> <p>I suggest the authors carefully read discussions of articles in this journal and compare to their work.</p> <p>The authors should note that in discussion, you compare other results to your work, agree or disagree and site appropriately references that specifically relates to the sentence or paragraph you have introduce.</p> <p>The authors should therefore take their time to discuss the work well. It is the part of the article that brings out the flavour of a research work. Thus failure to do it well means failure of showcasing the research work as a good piece.</p>
