Title of the Manuscript:	Drug-Drug Eluting Stents Interactions (DDESI) after Percutaneous Coronary Intervention (PCI) in Coronary Artery Disease (CAD) Patients: A Multicenter Cross-Sectional Observational Study
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The title did not match with the content. The content only described the oral drugs used amongst different DES without further explanation about their interaction	
Minor REVISION comments	<ul style="list-style-type: none"> The introduction was too long and not straightforward The sample size was too small to assess the relationship or to point out the drugs/DES interaction since there were too many confounders regarding the combinations of the drug itself The interaction between two variables is unclear, it only stated and described the use of different DES 	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
