PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is an interesting article about interesting and important subject, however this article requires extensive English editing, nearly each sentence need to be rephrased. There are numerous errors that should be corrected, the word order in many places should be changed. Because of English the article is difficult to follow, some parts are impossible to understand.	
Minor REVISION comments	Abstract line 17: what do you mean by the latest pharmacokinetic and pharmacodynamics properties? I think it is our knowledge/understanding of the properties that changes, and not the properties themselves. Line 24: horribly emerging? Did you mean rapidly emerging?	
Optional/General comments
