

Editor's Comment:

Because of this experiment, use both aqueous and gaseous solutions of 1-mcp, the authors must therefore specify their title as fruit cucumber responses to aqueous application of 1-methylcyclopropene (1-mcp)

1) Authors should specify the cucumber planting area used in their experiment it is very importante. And they should specify the age of the cucumber fruit at the time of harvest.

2) Ambient temperature in which cucumber fruits should be kept, the authors should specify C, % hr.
