

Editor's Comment:

The authors have seriously improved their manuscript according to the remarks of the three reviewers.

My editorial decision is that this text can be published after still some minor corrections.

Corrections:

Page 9, lines 216-218. The sentence “.The results of the present study were also in concordant with the results of Beech et al. [21] and Fernandez et al. [22] where no effect was detected on pork quality carbohydrate (sugar) was added to the diet.” must be corrected by adding “when”.

“The results of the present study were also in concordant with the results of Beech et al. [21] and Fernandez et al. [22] where no effect was detected on pork quality **when** carbohydrate (sugar) was added to the diet.”

References.

Present the bibliographic references according to the instructions to the authors and check carefully. (see: <http://www.sciencedomain.org/journal/83/authors-instruction>)
