

Editor's Comment:

1- Some corrections by the referees have not adequately consider by authors. These corrections should be made by the authors. For examples:

“Result- Why the use of TLC, Column and Gas chromatography at same time. The reasons should be explained. Results/ Discussion session should be more robust.”

“State the full meaning of (S. Aureusi) then subsequently, you can abbreviate. Leave space before mentioning of the unit eg 2000ml be replaced with 2000 mL etc. “

2- Sections and titles complex in especially Material and Method. They can be combined, abbreviate and make it more understandable.
