

Editor's Comment:

The authors made the corrections mentioned in my report. In connection with the first remark, the authors must write in the beginning of the paper that the function θ must be also defined on the boundary of Ω ; even if θ is also defined on Ω . So write:

$\theta: \overline{\Omega} \rightarrow \mathbb{R}, \theta(x) \in W^{1,q}(\Omega)$.

My editorial decision is "Accept".
