

Editor's Comment:

With reference to our previous correspondence, I send my opinion concerning the manuscript entitled "Maize response to leguminous biomass composted with phosphate rocks in the Northern zone of Tanzania" (2018 JEAI 44573).

1. 1. No weather conditions for conducting research were presented in the manuscript.
2. 2. Marking the significance of differences between the means in Table 2 (C) and Table 3 (OC) are incorrect.
3. 3. Technical improvement of the manuscript is needed.
4. 4. The numbering of sub-chapters is incorrect.
5. 5. The manuscript should be prepared in accordance with the pattern used in papers already published in the journal (<http://www.sciencedomain.org/page/general-guideline-for-authors>)
