

Editor's Comment:

The decision for this article is accept after effecting the required changes indicated in the revised form attached besides the comments

1- Please, be sure that K in klebsiella is always capital letter; see conclusions and titles of tables for examples. Also, Table 4: Antibiotic susceptibility of isolated klebsiella Pneumoniae; p must be small letter, please review whole article carefully for this.

The attached revised form included some track-changes highlighted with green for help along with some miscellaneous minor spelling corrections

2- Use one word only either hemolysin or Haemolysin

3- In Table 1; please state which one is forward and which is reverse in each pair of primers used. Also, are they have a reference or designed especially for this study

4- I cannot find the final not numbered reference in the whole article; (Akubuenyi FC, Odokuma LO. Biogas production from domestic waste and its purification with charcoal. Pacific Journal of Science and Technology.2013;14(2):63-69.)
