

Editor's Comment:

I have gone through the revised manuscript and feedback to the reviewers' comments. This article is interesting. It has novelty and quality and it will be a good addition in increasing the impact of our journal. Therefore, I recommend publication of this article after the following corrections:

- 1) English language should be improved as there are many grammatical mistakes in whole manuscript.
- 2) There are formatting issues in whole manuscript (for example, after eq. (6) & (9), " in the limit $\square\square 0 \dots$ " etc.) . Therefore, author should revise carefully.
- 3) There are formatting problems with all figures. The captions and legends are not correct.
