

Editor's Comment:

I have gone through all the stages for evaluating the manuscript under review and my comments are as follows:

1. Four reviewers have reviewed the manuscript. I feel out of these four, two reviewers had not reviewed the manuscript appropriately as their review reports indicates no improvement is needed and the manuscript is well structured. However, two reviewers made scientifically sound comments on the loopholes of the manuscript on the manuscript and I do agree with their comments.
2. The authors have not even complied with the instructions of the reviewers, and have not improved the manuscript technically, grammatically and content wise.
