

**Editor's Comment:**

After analyzing the Reviewers comments and feedback, the manuscript still needs improvement in its title.

The present title "Knowledge, attitude and utilization of traditional medicine for type 2 diabetes mellitus among residents of Pakuri (St. Cuthbert's Mission) in Guyana" should be changed to "Knowledge and utilization of traditional medicine for type 2 diabetes mellitus among residents of Pakuri (St. Cuthbert's Mission) in Guyana".

there can not be "attitude" of Diabetes mellitus, thus it should be removed.

After the change, manuscript is accepted for Publication.
