

**Editor's Comment:**

I think that the manuscript " Factors Affecting Farm Mechanization – A Case Study in Assam, India" should certainly be accepted for publication. It is a valuable work of significant practical importance with large experimental part and well done statistics.

There is only one drawback in the text: references in the text, lines 79 (Mwangi), 126 (Uaiene), 129 (aslan), 209 (Ghos ), 215 (Bac) and 225 (Kehinde)- should be marked by numbers.
