

Editor's Comment:

I examined the article according to the opinions of the reviewers and other editors. I mentioned errors below. After all these evaluations, it is worrisome that these errors still exist in the article.

1) The column C in the Table 2 is not true. If all data are true, It have to be 48.7a, 44.5ab and 41.6b...!

2) The column P in the Table 2 is wrong.

All data are looking same. If the data are true, It must be statistically not important.!
