

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Advances in Research
Manuscript Number:	
Title of the Manuscript:	Effects of Lubrications on the Wear Parameters of Metals Using Pin-On-Disk Test Rig
Type of Article:	Original Research article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
SEM image is one of the important supporting documents for wear studies. The author should try to add at least one or two SEM images of the samples after and before the experiments.	Yes, SEM is very important in wear studies. But, i did not consider SEM for the metals. I considered SEM for the composite, which i studied along side with the metals. It's so unfortunate; Please I cannot add any SEM image now. The materials and resources for that are not available. Thank you
