

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Journal of Applied Chemistry Research</a>
Manuscript Number:	<b>Ms_AJACR_48900</b>
Title of the Manuscript:	<b>Effects of Continuous Deep Fat Frying on the Physicochemical Properties of Assorted Brands of Edible Cooking Oils Sold in Greater Metropolitan Kampala</b>
Type of the Article	<b>Original Research Article</b>

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The authors should do a thorough review of the manuscript in terms of the abstract, introduction and results/discussion</p> <p><b>The abstract should be reviewed and must be precise and brief to the topic.</b>  <b>The Introduction must be reviewed to focus on the effect of the deep frying on the Physicochemical parameter rather than on deep frying and oil stability.</b></p> <p><b>What type of Oven was used?</b></p> <p><b>The sentences in the whole work should be reviewed to make it easier to understand.</b></p> <p><b>Figures 1-4 should be removed.</b></p> <p><b>The issue of hard and soft oil was not well explained as it appeared in the abstract, tables and then in the Figure 5.</b></p> <p><b>Please the discussion is far from the figures and tables.</b></p> <p><b>The results should not be separated from the discussion ( i.e. 3.0: Results and Discussion).</b></p> <p><b>The discussion for tables 1 should follow together with their TOTOX graph. Similar action should be done for the other tables.</b></p> <p><b>The author should also explain the significance of the physicochemical parameters and how they are related to the quality of the Oil. These measured values should also be explain after every table.</b>  <b>The conclusion should be summarized and include numbers (such as PV is 1.02 for example)</b></p>	<p>-Abstract has been reviewed</p> <p>-Whereas it may seem straight forward to give the direct effects of deep frying on quality parameters of oils, it is worth noting that these attributes translate into the overall frying stability of the oil. If the reviewer of this manuscript took a little read through the frying stability of the oils, it should have been noted that this subsection talked about some of these physicochemical properties of edible oils and how they varied as reported by other authors</p> <p>-All figures in this manuscript were omitted</p> <p>-There is no problem with the tables being separate from the discussion as explained in the Manuscript template for AJACR.</p> <p>-The significance of the investigated properties in terms of the oil quality were extensively explained in the discussion of results.</p> <p>-The conclusion has been adjusted accordingly</p>
<b>Minor</b> REVISION comments	<p>A general review of the manuscript is needed to make the article acceptable to the standard of this Journal. The sentences should be reconsidered for easier understanding and the number of tables Should be reviewed.</p>	<p>-Review of the manuscript done. However, reducing the number of tables in this manuscript alters less and keeps the manuscript too condense for discussion.</p>
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
