<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>In this paper authors tried to adopt an in-situ measurement approach in order to quasi-accurately estimate temperature of Oven; wind speed in bakery and ambient temperature in bakery. The relationships between the measured parameters were obtained from plots of wind speed against Temperature and Temperature of oven against distance from Oven. Author's found out that the temperature exposure of workers in all the bakeries under study exceeded the WHO (20-29°C) exposure limit for comfort. All the bakeries visited during this study all used firewood industrial oven.</p> <ul style="list-style-type: none"> <li>The study is interesting and manuscript is almost structured properly.</li> <li>Following amendments are needed-</li> </ul> <p><b>Page 5, Line 143; MATERIALS AND METHODS</b> <i>is to be replaced as: MATERIALS AND METHODOLOGY</i></p> <p><b>Page 12, Line 236-245; CONCLUSION</b> <i>is to be re-written points wise.</i></p>	<p>Thank you for your encouragements.</p> <p>All points corrected</p>
