**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>The subject is interesting. However, some issues should be improved:</p> <ul style="list-style-type: none"> <li>The methodology has to be expanded and the specific SNA procedures and analysis adopted must be more explicit and detailed.</li> <li>Figures 1 to 4 have very poor reading. I suggest their replacement for increased quality images, one per page, horizontally aligned. That will immensely improve the reader's ability to interpret the images.</li> <li>A three paragraph conclusion is clearly insufficient and must be expanded in order for the article to be publishable.</li> </ul>	<p>Thanks for the valuable comments.</p> <p>First, the methodology has been expanded. The specific SNA procedures and analysis adopted have been done extensive additions and rewriting.</p> <p>Second, figures 1 to 4 have been re-numbered and been replaced for increased quality images, one per page, horizontally aligned.</p> <p>Third, the conclusion has been expanded.</p> <p>The authors hope this paper becomes more readable and acceptable now.</p>
<b>Optional/General</b> comments
