**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The topic focuses on "teaching and learning of English". However, it is found that the Abstract focuses solely on "teaching and learning of computers". Then, in the Introduction, it focuses on "teaching and learning of computers" only, even though in the Result, it presents both the discussion of teaching and learning of computers and English. The content is really confusing. Besides, the Conclusion is very weak with only one sentence. It gives the research no enlightenment. Furthermore, the Reference shows only one citation reference, which demonstrates that this research is either innovative or validated.  The yellow marked parts are the ones with grammar mistakes or careless structured sentences.	Corrected
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
