Compulsory REVISION comments		
Minor REVISION comments	<ul style="list-style-type: none"> There is need to improve article by using more logical linkage approach of variables Writer need to clear how generalizability issues can be solved 	<p>The logical linkage of organizational culture and organizational citizenship behaviour is stressed already in the theoretical framework as edited recently</p> <p>Generalizability of the findings particularly on the significant relationship between is ensured because the statistical analysis was done at the 0.05 level of significance. Data screening was also done to ensure that assumptions for parametric testing were met.</p> <p>Despite the high levels attained in both variables correlated, it does not necessarily imply that the correlation coefficients obtained are also high. Correlation just detects covariances or changes in the value of y given a change in the value of x. This further means that there is a relatively low amount of change in the dependent variable as the independent variable changed.</p>
Optional/General comments
