

SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>I review the original manuscript. comments from reviewers and feedback from authors, and the corrected version of manuscript.</p> <p>There is no sample size calculation.</p> <p>The authors should calculate the sample size from the results to know the power of the study.</p> <p>I consider that in list of references there are a lot with less ten years old and they should to have doi.</p>	<p>A total study was done and has been included. This was reported in lines 91-96,All participants aged 18 years and above who gave informed consent were included in the study.....</p> <ul style="list-style-type: none"> - Since total study was done, there is no sample size calculation. - Equally this is a descriptive cross sectional study. Even if formula was used it will still not capture power but level of confidence represented as $Z\alpha$ <p>Thank and noted. However, we could not find recent works that will to replace the ones in the work.</p>
